

Attention all IPL Technicians!

The future of professional Intense Pulsed Light treatments is here!

SPA99 Skin Pigment Analyser

Quickly and accurately determine background melanin and erythema levels in your clients skin, allowing you to more confidently choose correct energy settings.

Reduce your liability risk & provide a truly professional service to your clients

- **Avoid problems with post treatment pigmentation and burns from incorrect energy level settings**
- **Determine Fitzpatrick type in seconds**
- **Accurately predict response to sun/UV exposure**
- **So easy to use! - Instructional workbook included**

A MUST HAVE reference device for Intense Pulsed Light technicians

The SPA 99 provides an accurate point of reference that will eliminate guesswork, providing greater professional credibility and client confidence

The Essential IPL Tool!

Simply press gently against your clients skin and instantly see background melanin and erythema levels on the high visibility digital display.
